Campaigning for Light Rail

Light rail - better for the environment

Bordeaux

- Electric light rail makes no pollution at the point of use.
- It uses energy more efficiently than buses or cars, and so has a smaller carbon footprint.

- Electric systems can be powered from renewable sources.
- Light rail is quiet in operation.

Parry

Nantes

- It enhances the urban landscape, making city centres more attractive places to live and work.
- Introducing light rail helps tackle climate change, improve air quality and reduce fossil fuel use.
